

It's time to eliminate legacy backup with FirstLight's Veeam-powered backup & disaster recovery solution. From a single management console you can now experience fast, flexible backup and replication while leveraging the Firstlight cloud for off-site storage and disaster recovery.

FirstLight's Cloud-Based Disaster Recovery Solution

Why settle for simple backup when you can get complete availability for your physical and virtual workloads! FirstLight can support Hybrid Cloud or Cloud to Cloud Disaster Recovery

Hybrid Cloud Disaster Recovery

Your Infrastructure Targeting FirstLight's Cloud for Disaster Recovery

Replication over FirstLight's Network (via Cloud Connect or over the Internet) supports RPOs up to 4 hours and carries **no data transfer fees** in or out!

Firstlight's **VMWare Powered Cloud** provides a target for your VMware & Hyper-V Environments with rapid recovery of applications and data if your primary data center suffers a downtime event.

Cloud to Cloud Disaster Recovery

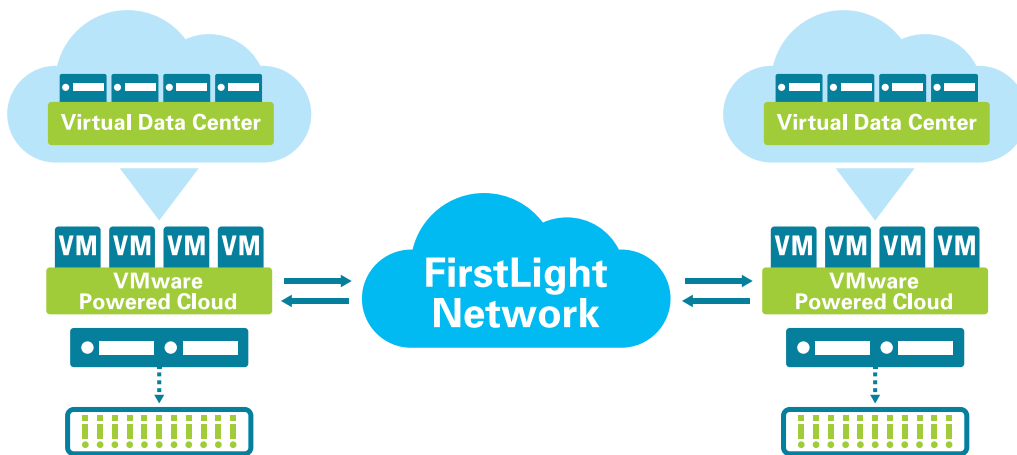

Cloud to cloud replication with georedundancy and free data transfer between FirstLight's cloud sites in New York & Maine.

No Data Transfer Fees!

- Replication is free leveraging FirstLight's 10 Gbps Network Between New York & Maine
- Firstlight's VMWare Powered Cloud Sites in Maine & New York provide geo-redundancy over a low latency network, supporting primary and DR workloads.

End-to-End Quality

- FirstLight owns the network, the data centers and the cloud infrastructure, ensuring end to end quality to meet all of your computing and data protection requirements.

FirstLight's DRaaS Features

Cloud-Based Recovery – Achieve recovery point objective up to 4 hours and recovery time objective of just minutes by recovering your systems in FirstLight's VMware-Powered Secure Cloud

Image-level VM Replication – Replicate VMs to the cloud for high availability or disaster recovery

SureReplica – Automatically test and verify ever VM replica for recoverability

Build-in WAN acceleration – Get replicas off site up to 50x faster and save bandwidth

Direct Cloud Connectivity – Leverage FirstLight's low latency fiber network to support faster replication and end-to-end quality

Failover and Failback – Replica rollback and assisted failover and failback with little to no business interruption

VEEAM

Supported Environments

VMware infrastructure

Platforms

- vSphere 6.x
- vSphere 5.x
- vSphere 4.x

Hosts

- ESXi 6.x
- ESXi 5.x
- ESX(i) 4.1

Software

- vCenter Server 6.x (optional)
- vCenter Server 5.x (optional)
- vCenter Server 4.1 (optional)
- vCloud Director 5.5,8.0, and 9.1 (optional)

Virtual Machines

- All OS's supported by VMware*
- Any Application
- Any file system

Editions

Veeam Backup & Replication comes in three editions – Standard, Enterprise and Enterprise Plus – so you can choose the one that best meets your needs and budget.
